Subject: Re: FW: Vohres site visit May 13th EPA & FO2

Is anyone planning to take water samples tomorrow from the well or tile water entering the improved sinkhole?

Thank you Theresa. Jeremy Klatt, Environmental Specialist Senior with FO2, will plan to attend the site visit with you. Should you have a need or desire to communicate with Jeremy beforehand, he can be reached at either jeremy.klatt@dnr.iowa.gov or 641-425-8042.

Thanks again,

-Trent

Trent,

Your field staff joining me on the site visit would be most welcome, especially since they have historical knowledge. I will be at the Vorhes farm May 13 at 11:00 with Claire Hruby. I spoke briefly with Mr. Vorhes, but he had so much to say that I requested he summarize the situation in an email. I will forward his email "summary" so you can pass it onto your staff. That document is the only new information that we have received. I will keep you updated if anything new comes in.

Terri

Good morning Theresa,

As Mark mentioned in his email, I am the field office supervisor in the region where the sinkhole in question is located. Having been made aware of your impending site inspection next week, I would respectfully request that one of my field staff accompany you, et al, during the inspection. The reason for my request is twofold: 1) one of my staff has been involved in this matter historically, and knows both the Vorhes and the situation well; and 2) since our field office has a long history with this situation, I feel that we should be included in any and all on-going activities concerning the matter even if only in a bystander/informational capacity.

I would appreciate it if you could respond and let me know if this is acceptable to you.

Thank you,

-Trent

Theresa and Trent,

Since I talked to both of you this morning, this email is to introduce you two to coordinate on EPA's site visit scheduled for May 13th. Theresa is with EPA Reg. 7 and will be doing the site visit and Trent is the Iowa DNR Field Office Supervisor. I'll let you two take it from here, and I do not need to be copied on future emails. I appreciate the conversation I had with both of you this morning. I'm just trying to connect all the dots :)

Thanks,

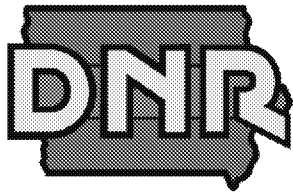

Mark
